Re: *Protecting Georgia's Pollinators* document

The Georgia Structural Pest Control Commission (SPCC) serves the public and the professional pest management industry by promulgation of appropriate Rules for the Georgia Structural Pest Control Act, advising the Georgia Department of Agriculture on enforcement issues and ensuring the proper licensing of pest management companies, certification of operators and registration of employees. Central to the SPCC's many activities is the protection of the health and welfare of Georgia including protection from the misuse of pesticides.

The SPCC submitted comments and recommendations on February 6, 2015. The SPCC appreciated that opportunity and supports the June 4th published *Protecting Georgia's Pollinators: A state plan for promoting a large, healthy and diverse pollinator workforce*.

The SPCC appreciates committee members for making this effort a priority and for taking their valuable time to produce a document that is practical and effective.
