

**Definition of Integrated Pest Management:**

Integrated Pest Management (IPM) for Structural Pest Control is a philosophy of pest management outlining a decision-making process aimed at achieving sustainable reductions in pest populations and their potential for growth. Successful IPM programs incorporate judicious application of control methods including, but not limited to, sanitation, habitat modification, exclusion, repellents and pesticides.

**Definition of Green Pest Management:**

Green Pest Management can best be defined as a service that employs an Integrated Pest Management (IPM) approach while utilizing fewer of the earth's resources as part of a larger effort to reduce human impacts on the environment.
