

Soil Amendment Registration Checklist

- Soil Amendment Label** – Include a draft copy of the label
 - The product name.
 - A statement of specific claims, or, if no specific claims are made, the soil amendment's value.
 - The concentration of soil amending and other ingredients.
 - Directions for use.
 - The net weight or volume; and
 - The name and address of the registrant.

- Proof of Claim of soil amendment's usefulness or value-** include experimental data
 - Submitted the experimental data
 - To be submitted at renewal

- IBD Product Determination**
 - IBD soil amendment derived from sewage sludge.
 - IBD soil amendment derived from drinking water treatment plant residuals.
 - Class A or exceptional quality sludge under EPD permit
 - Constitutes compost produced by a Class I, II, or III composting or anaerobic digester facility under EPD permit
 - Constituting forest products or soil amendments derived from industrial by-products generated solely from forest products, excluding chemical by-products of pulp digestion, slates, clays, shells, gypsum, and lime.

- IBD Product Supplemental Requirements**
 - The name and contact information of each person generating an industrial by-product proposed to be incorporated into the soil amendment and the address of the industrial by-product generation site

 - The SIC Code or NAICS Code of each industry from which each industrial by-product proposed to be incorporated into the soil amendment has been derived.

 - A description of the industry process or processes producing each industrial by-product proposed to be incorporated into the soil amendment.

 - A description of the intended use of the soil amendment that includes, but is not limited to, intended impacts on the properties of the soil to which the soil amendment is applied, crops supported by the application of the soil amendment, application rates of the soil amendment, and the intended frequency and timing of application.

 - A description of any general site or application restrictions; and
 - A current representative analysis of the soil amendment.

Soil Amendments Derived from Sewage Sludge

- The classification of all sewage sludge proposed to be incorporated into the soil amendment, as defined in Ga. Comp. R. and Regs. r. 391-3-6-.17.
- The name, contact information, and EPD permit or registration numbers of each facility generating sewage sludge proposed to be incorporated into the soil amendment and the address of the sewage sludge generation site.
- A description of the intended use of the soil amendment that includes, but is not limited to, intended impacts on the properties of the soil to which the soil amendment is applied, crops supported by the application of the soil amendment, application rates of the soil amendment, and the intended frequency and timing of application.
- A description of any general site or application restrictions; and
- A current representative analysis of the soil amendment.

Sewage Sludge Derived from Drinking Water Residuals

- A description of the treatment process or processes producing the drinking water treatment plant residuals proposed to be incorporated into the soil amendment.
- The name, contact information, and any EPD permit or registration numbers of each facility generating drinking water treatment plant residuals proposed to be incorporated into the soil amendment and the address of the drinking water treatment residuals generation site.
- A description of the intended use of the soil amendment that includes, but is not limited to, intended impacts on the properties of the soil to which the soil amendment is applied, crops supported by the application of the soil amendment, application rates of the soil amendment, and the intended frequency and timing of application.
- A description of any general site or application restrictions; and
- A current representative analysis of the soil amendment.

Nutrient Management Plan

- Includes a copy of the Nutrient Management Plan
- Will develop a Nutrient Management Plan forty-eight hours prior to application to the site.
